

World Undernourishment

Africa's Undernourishment

Highest Country (above 35%)

Undernourishment and
Temperature change

Which country's need help
the most

How does this dashboard work:

There are some visuals where you might need some information about:

The (Play Axis) which looks like this:      Year /ou through the years if you press "play".

The buttons in the top are all useable, and the icons in the top left will send you to the corresponding SDG.

In this dashboard I show visuals and data about SDG 2 - Zero Hunger & SDG 13 - Climate Action. If the buttons don't work then here is a separate link for both

SDG 2 - Zero Hunger: <https://www.globalgoals.org/goals/2-zero-hunger/>

SDG 13 - Climate Action: <https://www.globalgoals.org/goals/13-climate-action/>

At the last page you need to select the same country from both of the slicers so that all the information about that country will show.

If you want to compare country's you can, just by choosing 2 different countries.

With CTRL Click you can select multiple countries. But keep in mind if you do so the averages will not be correct anymore.

I hope this data can help with making a change in the future! Enjoy!
